Site is near a large city. But is in a more isolated area away from the city (commuting distance). Large complex. There is a "militaristic" feeling to the complex - based more on attitudes and demeanor of people. People there are not in military uniform. Bldg. is administrative in nature - reception area, offices, conference room/auditorium, and a 5<sup>th</sup> floor that is guarded as a storage area with large heavy vault-like doors. Feeling that is very free, prof. It has a musty smell. Large numbers of records are maintained - deal with people and contain personal information. Some of the records are very old. (See Break - IRK area). Personal history files. See Break - Chernobyl victims.

People are from select segments of society - political  
 leftists. ← AM  
 AM also Cochran

Political this - people who have "disappeared".  
 Possibly political personnel and families.  
 Keeping track.
